

Final Fantasy VIII - Queen of Cards Quest on Disk 4

This short guide describes and explains how to get the Queen of cards (QOC) cards (Chubby Chocobo, Doomtrain, Phoenix, Kiros, Irvine) on disk 4.

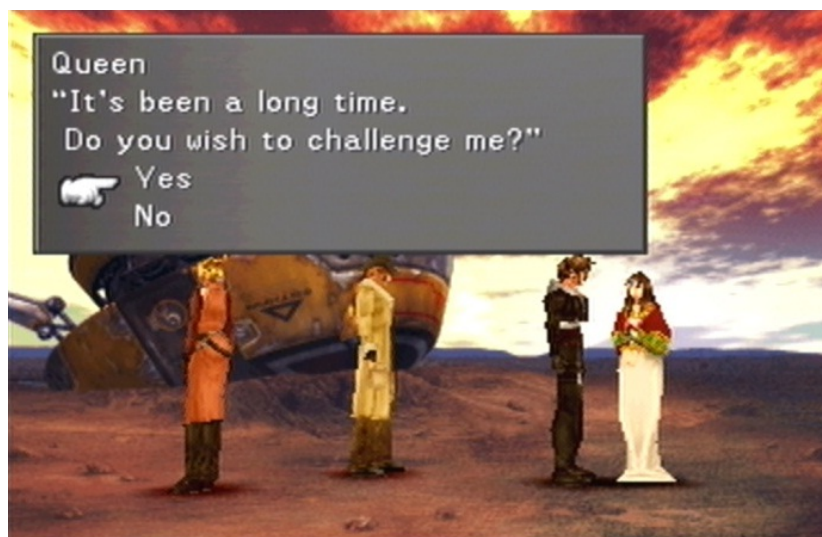

I prefer this method as it means I don't have to follow the Queen all around the world, losing rare cards and having to win them back, which as you may already know takes along time!

Go to the Abadan Plains in the Esthar region and go to where I am in the screen shot below.

Begin running around near the tip of the peninsular (just in front of where Squall is standing in the first screen shot). You cannot see it from the map but there is actually the crashed lunar escape pod from disk 3.

Once you go to the right area you will find the QOC standing next to the crashed lunar escape pod as per the screen shot below.

If you haven't previously gotten the QOC side quest cards she will have all of them!

The only catch is that she uses all the rules (yes Plus and Random ☹) which can make it difficult as well as often playing 2 or 3 rare cards at a time. So just make sure you save each time before you vs her and save each time you win a rare card.

This can be tedious and take a while but it is a lot quicker than doing the QOC side quest earlier.

Hope you found this useful, not many ff8 players know about this little trick.
