

## Final Fantasy VIII - Unlimited GF and Player Cards Guide

This is probably my favorite little ffviii tip I can give you. It is possible (and if done right EASY) to get unlimited GF and Player cards on disk 4.

The only condition for this is that the card Quest at Balamb garden must have been completed earlier.

On disk 4 after you regain access of you Ragnarok you may notice that the Xu and Company are on the Ragnarok.

If you use the card mod ability on a player or GF card (just stick to non queen of cards quest cards for now) then play Xu you may notice that the card you just modded will show up in her hand!

Now you're probably thinking sweet, that sounds good but there is one problem. Xu likes to use nasty rules like plus and random. I personally find it difficult to win with those so were going to have to get them abolished.

The only way I know to abolish rules (on disk 4) is to challenge Xu, accept then once at the play or quit screen select quit. If you do this over and over she will eventually drop a rule (hopefully plus or random). This is very annoying and tedious so be patient, think of all those lovely items! Once done your rules should look like the ones above, some are annoying but it makes winning much easier.

So there we are, my card modded Eden has just shown up in Xu's hand!

Victory!

As you can imagine there is a ton of good stuff to get. I like getting items that raise stats, look below to find out how.

Gilgamesh – Mod's into 10 holy wars which convert into 2 knight codes using Eden GF. Each knight code can be modded into 1 vit up using Doomtrains Forbid Med - RF.

Minotaur – Mod's into 10 Adamantines, use Doomtrains Forbid Med – RF to refine 5 Adamantines into a vit up.

Eden – Mod's into 3 Monks Codes, each monk code converts into 1 str up using Doomtrains Forbid Med - RF.

Ward – Mod's into 3 Gaea's rings, each Gaea's ring converts into 1 HP up (HP +10) using Doomtrains Forbid Med - RF.

You can also get mag ups by modding the Edea card and spr up using Rinoa cards but they this is pretty unfeasible (each turns into 3 items and you need 10 to make 1 spr or mag up).

### **Queen of Cards Side Quest Cards**

It is possible to get unlimited Chubby Chocobo, Phoenix, Doomtrain, Kiros and Irvine cards but it is pretty difficult.

To do so play the left Diamond girl (make sure you mod a Chubby Chocobo, Phoenix, Doomtrain, Kiros or Irvine card first!) She will play the rare card occasionally (nowhere near as much as Zu who plays it 2 out of 3 times or more). Unfortunately she uses Plus and Random to top it off ☹️.

So there you have it, hopefully you found that useful! For more cool info, check out my [ff8 tips](#) section.
